I'm glad to see this come to light and the right decisions being made. But we have a HUGE PROBLEM here and it is not going away. An obvious pattern of charging (and in many cases way over charging) what is almost exclusively conservative leaning people for crimes that either never occurred or did not rise anywhere near to the level of how they are being prosecuted. It is good news that many of the defendants are beating the charges, but at what cost? Financially, physically, emotionally the people are being DESTROYED! They are losing their jobs, homes, cars, relationships and almost certainly their minds. This is sickening and has to be confronted and stopped by any means necessary. We still have dozens and dozens of people being held in jail, without official charges in some cases, for the January 6th rally. This is AMERICA....just how the phukk is this allowed in our supposed First World, Constitutionally Based, Bill of Rights, Freedom Loving country in the year 2022??? The answer is: WE ARE AT WAR with the left and the globalists and have been for some time. I fully expect to see more of this FAKE JUSTICE as we move forward. Every single branch of our Federal Government has been hijacked and weaponized. Not sure how to resolve this....at least not by peaceful means. Voting does not matter and won't change a damned thing. Running out of options....
