We are not under a Marxist takeover. The Marxists, Antifa and other crazies are sponsored by western corporate oligarchs (e.g. Soros, Blackrock, etc.) and they have only one aim - Orwellian style global corporate domination. They aim to undermine and bankrupt cities/ states, then privatize all public works and services to turn a corporate profit - Detroit style. Open borders, a.k.a free movement of cheap labor, are designed to suppress wages and further undermine social fabric and public finances. Artificially suppressed CB rates, unchecked inflation, promote public and private debt enslavement and facilitate wealth transfer. The green agenda is nothing but a scam to entice government grants/ investments/ debt to turn more profits - notably *private/public partnerships* ring loud in UN and WEF green talking points. Ukraine is merely a patsy designed to shut off cheap Russian gas in favor of advancing western corporate interests, placing U.S. as #1 LNG in global export capacity. And everyone in the world is paying more for *everything* there-in directly lining the corporate coffers based on some mistaken myth that we are all tied into some global price structure despite being awash in resources as a nation. And until Russia capitulates to the globalists and provides unfettered western corporate access to resource rich Siberia, Putin is the MSN *boogie man*. Information must be controlled, personal movements monitored, decent will not be tolerated, travel and financial access will be the new control levers. Marxists themes yes, but in all in the name of corporate profit, with no checks and balances as our governments are corrupted by corporate (e.g. Soros/WEF) sponsored politicians.
