

# Hotez Calls For Police Deployment Against "Anti-Vaxxers"

**BY TYLER DURDEN**

**SATURDAY, AUG 03, 2024 - 08:00 PM**

*[Authored by Paul Thacker via The Brownstone Institute.](#)*

Social media went a little bonkers last week when an interview of Texas Children's Hospital's Dr. Peter Hotez began circulating with the Big Pharma insider calling for the United Nations and NATO to deploy security forces against "anti-vaxxers" in the United States. Dr. Hotez's statements first appeared on the YouTube channel of an international pediatric conference that took place in Colombia, but the interview then jumped onto X.

The Simposio Internacional de Actualización en Pediatría (International Symposium of Pediatric Updates) later [removed the interview from YouTube](#) although photos can [still be found on Facebook](#).

In clips of Hotez's interview that continue [to circulate on X](#), he claims "anti-vaxxers" caused hundreds of thousands of deaths in the United States. I uploaded one clip to my YouTube channel [which you can watch here](#):

What I've said to the Biden administration is, the health sector can't solve this on its own. We're going to have to bring in Homeland Security, the Commerce Department, Justice Department to help us understand how to do this.

I've said the same with...I met with [WHO general director] Dr. Tedros last month...to say, I don't know that the World Health Organization can solve this on our own. We need the other United Nations agencies—NATO. This is a security problem, because it's no longer a theoretical construct or some arcane academic exercise. Two hundred thousand Americans died because of anti-vaccine aggression, anti-science aggression.

And so, this is now a lethal force...and now I feel as a pediatric vaccine scientist...it's important, just as important for me to make new vaccines, to save lives. The other side of saving lives is countering this anti-vaccine aggression.

**Hotez has long been noted for promoting controversial and sometimes false statements about the Covid pandemic and then accusing his critics of "anti-science."**

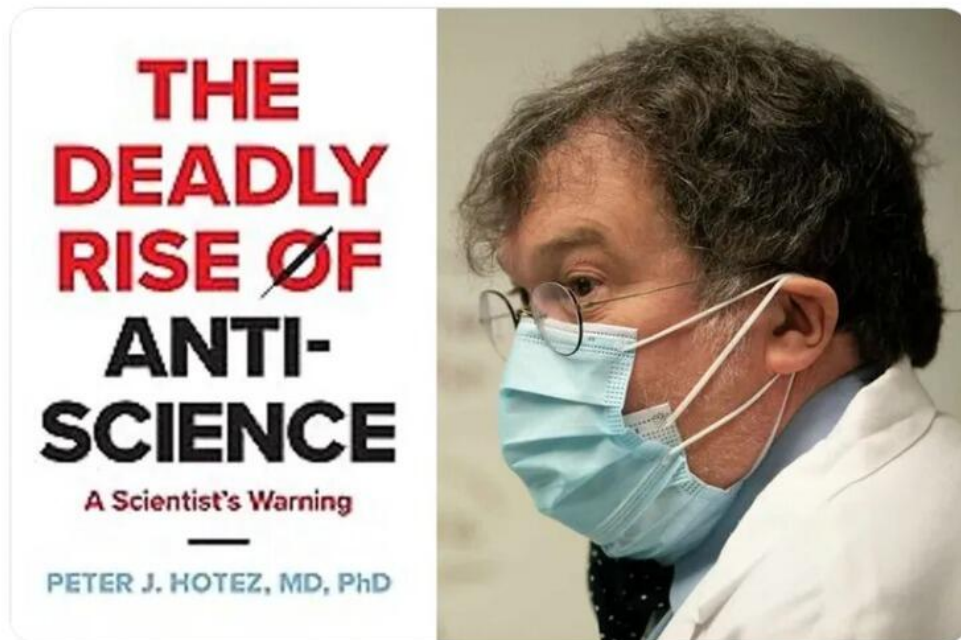

**Martin Kulldorff** ✓

@MartinKulldorff

Is his book an autobiography? When pushing covid vaccine mandates, @PeterHotez denied the existence of natural immunity after covid recovery. A deadly anti-science position.

But this is not the first time Hotez has called for police to deploy against those who disagree with his views on science. Last October, *Scientific American* platformed Hotez as an expert on "anti-science" and didn't bat an eyelid when he [said support for scientists would require intervention](#) by the Department of Homeland Security and the creation of a federal interagency task force.

**Paul D. Thacker** ✓

@thackerpd

...

The great thing about Scientific American is they give Peter Hotez a stage to rip off all his clothing and start ranting in public. Because people have criticized some of his wrong-headed statements on vaccines we need to activate the United Nations, multiple federal agencies and NATO.

It's like that guy you remember from college you had to avoid on the quad while trying to get to your next class, because he was carrying a banner and shouting from a bullhorn. Hotez never moved on from that.

[scientificamerican.com/article/vaccin...](https://scientificamerican.com/article/vaccin...) Scientific American is happy to play bullhorn.

### **What can be done to combat antiscience attitudes and support science and scientists?**

I don't think the community of scientists by itself can solve this. We're going to need help, both from the White House and the United Nations because this is now a politically motivated assault. So we need the White House, for instance, to treat this like any politically motivated attack on the country, whether it's a cyberattack or global terrorism or nuclear proliferation.

The first step is bringing in people from the Department of Homeland Security, the Department of Commerce, the Department of Justice and the Department of State because of the role of Russia in amplifying the discord. I think we need an interagency task force [in the U.S.] and the same at the U.N. I don't think the World Health Organization can solve this problem. I think this needs to go to the attention of the U.N. General Assembly and maybe the Security Council and NATO, perhaps, because it is a security threat, and it undermines democracies and the security of countries.

Dr. Hotez again called for deploying federal police to support science during a grand rounds lecture he gave in August 2021. A whistleblower at Texas Children's Hospital sent me the lecture where Hotez said the "disinformation empire" threatened America and would need to be dealt with by the Department of Homeland Security:

*The problem is the disinformation empire is so vast and pervasive that until we do something more definitive to get to the source of the disinformation and stop it, it's not going to have that much of an impact. And that's where everybody moves away from me.*

*And I tend to be out on a...out on my own here.*

Earlier this year, [Time Magazine](#) named Hotez a "Science Warrior" and one of the 100 most influential people in global health.

Genocidal ((Peter Hotez)) has a death wish. Idiocy is their fake excuse for being genocidal. They know exactly what they are doing.

What is it with these genocidal animals? His own autistic daughter is vaccine maimed. Maybe she will do the rest of us the honor.

Trump assassination, CoVid and 9/11 among a litany of hits proves to anyone conscious that we cannot trust Washington, DC.

*"Every bit of the stories were true. The 61 page DEA report gives detailed information about their identities, actions and claims. Some of the phony art students (IDF bomb technicians) were allowed to live on the 91st floor of the WTC for a whole year with 24 hour access into both buildings to work on an alleged art project.*

*They called themselves the "E - TEAM" aka "Gelatin B Thing." Now it's clear the "E" was for EXPLOSIVES TEAM. Gelatin is also an ingredient used in bombs, hence the "B Thing." Israeli terrorists have never been subtle. The art project involved rigging both buildings with fuses to put their name "E-Team" in lights on 1 building. No doubt a trophy*

*record of their handy work to go along with the photos they took of themselves rigging the bombs. Their name in lights was exactly where one of the planes hit.*

*The claim that they were tracking the middle eastern terrorists was a lie. No middle eastern terrorists were involved, only Israeli & American ones. More than half of the alleged terrorists have turned out to be alive. Yet the FBI refuses to clear them. They also found Urban Moving Systems was a Mossad front but haven't addressed it. Just more evidence that the terrorists were Israeli & American. Other Israeli's were pulled over for driving around in their truck with a mural of a plane flying into the towers that day. They too were released.*

*Among the different types of bombs they used, two 2 kilo ton mini nukes (aka backpack nukes) made in Dimona were placed in each tower basement. FEMA's Human Remains Recovery Team GPS map proves it. It shows the almost 3,000 people inside the towers were blown into 21,812 tiny pieces of flesh found as far as 3,368 feet away (the distance of 11 football fields).*

*Nothing else in the world has the power to blow objects the distance of 11 football fields. That's the real reason hundreds of cars within a 5 block radius caught fire (evidence of nuclear fission) and why so many people died from cancer (mostly thyroid from radiation as opposed to lung from asbestos). It's also why most of the buildings turned to dust with fires burning for 3 months" – Izraul Hidashi.*

It can be argued the US government was not only complicit, but that it asked the Israelis to be here. The Israel Lobby was instrumental at getting this mess swept under the rug, and memory-holed (turns out this puzzle was solved long ago). For good? I would say We the People hold a Sword of Damocles over their heads.

So, Bacon's Rebellion can't even read. The PREP Act was passed way back in 2005, long before Trump ever set foot in the White House. As for who profited from the COVID vaccines, it wasn't Trump—it was the NIH scientists, with 154 of them raking in royalties, and of course, the big pharma companies.

as for the rest of the United States population, which is the most heavily armed population on the planet, go after their kids, through treachery or trickery, or forced vaccinations, which I am assuming ALL now contain this cardiotoxic carcinogenic, fertility destroying mRNA bioweapon garbage in them, and you're going to see a very brief, very bloody Civil War.

The establishment altered their definition for vaccine just prior to Covid-19. Pharma have recently been lobbying very hard to amend the definition for gene therapy, even though they used the term several times in their vac-zi-nation documents. They also recently altered the methodology for calculating excess deaths, making it much more complicated to comprehend and to obfuscate the numbers. Their adapted figures now show a negative tendency, however, they failed use the same methodology to calculate the previous years figures.

Vaccines were used to kill, harm and/or potentially sterilise men and women.

When are the victims of these killers going to receive justice and why are the killers and their accomplices allowed to make such threats to genuine, living, real men, women and children?

My mom starved to death in her eldercare facility when [Gov. Blackface Klansman](#) locked me out of her life.

I visited her every day to feed her - because dementia left her unable to feed herself.

After Northam's coronahoax edicts banished all visitors from her nursing home, the staff would drop a plate of food in front of her 3x a day, then return to scrape the uneaten meal into the trash an hour later.

She died alone, hungry and afraid, never knowing why the only person whose face and name she remembered had vanished from her life.

After five weeks, the staff notified me she had died and sent me a photo of her emaciated skull so I could confirm her identity. I did not recognize her; she had been stripped of all dignity as a human being, a mother and a wife.

If, for even a moment, I were ever in the presence of Hotez, or Fauci, or Northam, or even Mr. "[Warp speed](#)" himself, nothing could prevent me from exacting severe revenge.

### Why I'm not vaxxed

- The media lied about the origin of Covid
- The 'vax' was rushed to market in an unfeasibly quick timeframe
- It was released under an EUA (Emergency Use Authorisation) licence, because there was no long-term data on its use
- mRNA vaccines had never been produced before (and one of the creators of mRNA technology, Robert Malone, said that it should not be used as a vaccine)
- Dr. Malone also observed that while previous vaccines exposed humans to a benign part of a virus, the Covid vaccine contained spike proteins—the part of the virus that forcibly inserts itself into human cells and replicates there
- The vaccine manufacturers wanted complete legal immunity from the effects of the vaccine, and were given it
- The sales agreements between Pfizer and governments were kept secret
- Senior government officials were given exemptions from taking the jab
- Doctors in the US were given \$40 for every vaccine that was administered (why the need for a financial incentive?)
- Healthcare professionals who wanted to speak out about the possible dangers of the vaccine were silenced or fired
- Japanese doctors discovered vials of the Moderna vaxx which contained tiny particles that were attracted to a magnet. Moderna did not withdraw their vaxx from circulation—they assured people

that only a small number of vials were affected (How could they know this without checking all the vials?). Many people later found that a magnet would stick to the injection site on their arm

- Moderna patented a genetic sequence in the *autumn* of 2019, which showed up in a disease which escaped from the Wuhan bio-lab in the *winter* of 2019. (How did Moderna know that this sequence would be found in a disease that hadn't yet escaped from a lab in China?)
- When some physicians suggested that Hydroxychloroquine or Ivermectin could be used to treat Covid, the media mounted a co-ordinated smear campaign against these drugs and anyone who talked about them. (The Indian state of Uttar Pradesh later used Ivermectin together with Doxycyclin to reduce their Covid infections by 94% in the space of three weeks. And yet, the media still refused to allow any conversation about Ivermectin's effectiveness, referring to it as 'horse paste')

How can a virus "forcibly insert itself into human cells" ? If virus are not a living thing, not a form of life, no means of motility no means of reproduction, a shell, a container with some genetic information inside (assuming they exist), how does it do anything on its own ?

Finally I had to ask my husband what was going on with men. Women following the protocols didn't bother me as much because they can be manipulated by fear more. But men? How could they go into active combat but run like scared rabbits over a cold virus? My husband explained that men are visually oriented and prefer to see the Visigoths cresting the hill to see and understand what they are fighting. Wars are won against men who cannot see a target with an invisible enemy. Look to history for examples. Wow.

IMHO, Hoetz is a narcissist with delusions of grandeur, and a state nanny of the highest order who thinks his beliefs should be forced on others, because it's good for them allegedly (though he's been wrong often). He's not going to like it when the mob turns on his beliefs and forces things he doesn't believe upon him - the same mob he's promoting today. I have seen multiple videos on X of people crying over loved ones who "died suddenly" shortly after "safe and effective"

People crying with chronic debilitating pain post "safe and effective"

People saying their goodbyes talking about turbo cancer post "safe and effective"

People angry about themselves or loved ones either dead, dying, or with quality of life issues post "safe and effective"

We already know that goalposts were moved, from "safe and effective will stop the spread" to:

"Safe and effective" will keep you from getting as sick

Thousands of people with video documentation of regrets for either themselves or loved ones taking "safe and effective"

Contrast all the above with the reality that i don't know anyone, nor have i seen any videos of anyone that has said or implied:

"I wish I would have taken safe and effective"

The medical establishment has done untold damage to its reputation, as millions of people have lost trust in doctors across the board because of the criminal nature of the entire medical establishment, with a few brave and notable exceptions (doctors) who put careers on the line to sound the alarm over "safe and effective"

**Hotez:** *The problem is the disinformation empire is so vast and pervasive that until we do something more definitive to get to the source of the disinformation and stop it, it's not going to have that much of an impact. And that's where everybody moves away from me.*

**reality:** *The entire mainstream media of planet earth was pushing the lies promoted by Hotez!!!! And he pretends that a few honest youtube and rumble channels is ... in comparison ... "vast and pervasive"?*

-----  
This guy wouldn't recognize "science" if it smacked him right between the eyes. The fact of the matter is, the bioweapon jabs against the COVID19 virus mass murdered untold tens of millions of humans around the world ... so far. And very few places that did not push the vaccine had **far fewer deaths** ... especially in the longer term. The deaths from the bioweapon jabs are still happening today, since the jabs damage the human immune system in many people. So millions more people will die of all sorts of maladies and diseases that would not have killed them had they not had their immune systems trashed by the bioweapon jabs.

This guy is truly sick in the head. Either that or he loves attention so much that he is willing to speak openly insane nonsense to get attention (which means he is sick in the head).

Oh, and BTW, the COVID19 virus was less dangerous than the flu that occurs some years. Which means, the entire COVID19 bioweapon jab campaign was intended to damage or destroy the immune systems of billions of humans, not prevent anyone from getting sick. The jabs were not safe and they were not effective ... except in destroying human immune systems and mass murder.

Although a Catholic, I grew up around bright, well-read Jewish folk, all of whom were keen advocates of reason, free speech, and fact-based problem analysis. Not one trusted the Federal government any further than you could throw the Statue of Liberty. Two generations later, there's a cadre of pro-government, anti-free speech statist that can't wait for the Feds to crush opposing ideas and the people who hold them.

Seriously, how did that happen? What did it? Schools, television, affluence, social media? That's an 180 shift in values.

The \*\*\*\* who were adults in the 40s, 50s, and 60s were small businessmen. Their boomer children (in my perhaps limited experience) were not much inclined to work at all, being primarily interested in spending and inheriting Daddy's money--at least the men, whose Jewish wives were often supporting them, while they engaged in some goofy pretend business, like running a macrobiotic restaurant that was only open on Tuesday and Thursday evenings, collecting antique sewing machines to refurbish for re-sale, or running some other small business that lost money. This is just my observation of Jewish (male) boomers, so this may not have broad application, but I have rarely seen such a bunch of losers.

Many of these guys eventually got government jobs, as did their kids.

There's been a shift in Jewish employment away from small business and towards government jobs.

Downvoted for your Dr. Mengele crack. Dr. Mengele, (not the twisted, creepy version that lives in your head thanks to the tribe's indoctrination techniques), would be HORRIFIED by what has been allowed to happen to medicine and legitimate science by HIS enemies...and OURS.

Dr. Mengele was a good man, still cruelly and crudely maligned to this day by scum who, unfortunately outlived the war they started, leaving you and the rest of us with nothing but lies to base our opinions on - until we wake up and burn these leeches off, that is...

Lesson#1: Dr Mengele was a Good Man. All kinds of nice people who knew him well thought so. Look up the information for yourself. But while scrolling around you might want to avoid any site recommended by AIPAC or the ADL if you're honestly interested in learning some FACTS rather than wasting your time reading frankly unbelievable LIES.

As I've gotten older and for the past few years I've begun asking myself, "who the \*\*\*\* are these people and why should I or anyone else listen to them? Who anointed these people the "arbiters of truth"? Why does most of society say in unison "this is a person of authority and we must listen to him/them!!!!". Why do most people fall in line and automatically do what people like Hotez say simply because he's on television and some faceless, busybody, DEI hire bureaucrat says so?

The Media and the Establishment is the enemy...that has never been more clear than it is now. Whenever I am at the airport or somewhere else were I am forced to watch the "news" I feel like I am watching a televised version of The National Enquirer or The Weekly World News...it's pure \*\*\*\*\* and nonsense meant to keep the low IQ halfwits living in fear and at the same time, entertaining them.

It's completely sick what passes for "news" these days and who the Establishment puts in front of the masses and then proclaims them "experts": Hotez, Bill Gates, Fauci, etc to name a few off the top of my head. What's even more disturbing is how many people accept them as "experts" and repeat what they say when having a discussion.

The good news is right about one year ago, Pravda (mainstream media) started doing a full court press on the newest booster coming out

This was late Summer early Fall last year (2023)

It failed spectacularly

I read an article 6 months ago that state governments were demanding Big Pharma buy back the boosters, as only around 3% of the original vaccinated took that latest booster

What this tells us is that the sheep know

Now, they won't push back violently because to get to that point would require admitting to themselves that they were chumps to ever take the vaccine

Nobody wants to admit they were the mark in a rigged poker game

But make no mistake

A 3% booster rate tells us that people knew they had been conned, and that is why they rejected the booster en masse

What Hotez understands and the biggest piece of real misinformation that the 'anti-vaxxer's' don't fully comprehend is that not only is the 'vaxx' not a vaccine at all, but it is a bio-hack.

What's more, the bio-hack is supposed to keep populations from undergoing 'negative' cognitive and behavioral changes, like prophylactic PTSD, among other things.

It's an evolutionary adaptation to the ecological collapse and mass extinctions that accompany instances of geomagnetic wander and the imminent collapse of the earth's magnetic field we are about to experience.

It wasn't supposed to kill 1/1000, they hadn't tested it enough, but given the stakes, they don't care, and wouldn't care even if it killed 1/100.

Well, apparently if deagle is accurate. That number drops dramatically.

In the context of recent events such as possibly lethal substances being mostly self administered to 80% of Western populations, it may be of some profit to start thinking critically.

I've read the prediction. Deagle's a think tank. They can be wrong. We'll have to wait and see.

Prepping for the worst cases should always be a priority, but the masses don't think that way. Maybe they're the ones Deagle is talking about.

1

**MarkU** 18 hours ago

[remove](#) | [link](#)

I've read the prediction too and its a poor match with 'vaccine' distribution (and its a terrible match for global nuclear war) The predicted population decline only seems to be significant in the west where lots of countries get reduced to something like their internal carrying capacity (or thereabouts) My conjecture is that Deagle's prediction was based on a complete breakdown in trade, maybe they expected a huge war in the middle east or something.

*What is albendazole?*

*Albendazole is an anthelmintic (an-thel-MIN-tik) or anti-worm medication. It prevents newly hatched insect larvae (worms) from growing or multiplying in your body.*

*Albendazole is used to treat certain infections caused by worms such as pork tapeworm and dog tapeworm.*

*Albendazole may also be used for purposes not listed in this medication guide.*

Ever wonder why we hear so little about our so called 'immune system'? That the bulk of it is located at our interfaces with the external like nose, mouth, throat, skin, lungs and stomach. If the theory is to expose us to a small part of whatever toxic substance makes us sick, then why would we bypass those interfaces and inject it straight into the bloodstream?

Why would vaccine manufacturers be granted legal immunity? It's not like this is an unimportant product that does not require consumer protection. Everything screams 'fraud' to me about this entire industry. Now that governments and international organizations are in on it demanding everyone to take their concoctions or be locked up, fired or what not, it's OBVIOUS that what they want is to inject this crap into everyone.

Why would authorities even try to hide statistics related to vaccines? Why would they even have to claim that we have to trust the science? Who actually says something so stupid? Science is about testing, probing and questioning. That's the whole idea of science. Claiming someone has science on their side is infantile and moronic. Typical politician idiocy.

Health does not come in the form of a pill, tonic or syringe. It comes from eating, drinking and living healthy and refraining from ingesting toxins.

very well put. in my experience, taking a clove of garlic when the sniffles start has averted many colds. as has eating fruit for the vitamin c content. in my case, since i had signed off teevee decades ago i'm not certain of this but my perception is that the lamestream didn't exactly promote any of the known home remedies like fresh fruit or a hot bath followed by wrapping yourself in blankets and sweating it out.

instead, although there simply was no massive plague of death stalking the night anywhere on earth, we were all to get mass-injected with an unproven miracle juice which was "free" because our taxes would be paying for it.

most people, other than the children, were not forced to take it and could have simply refused and yet the majority took it onboard and ruined their immune systems. what does that say about the thinking capacity of a typical adult?

this whole show has been the greatest evil of our lifetimes. and the worst part is that huge numbers of people will line up yet again.

The damage done to the medical and scientific community was largely done by greedy quacks like Hotez. Before they regain any of their lost following and the confidence they shredded telling us covid lies, they are going to have to get really honest about what happened, and why. The role of Big Pharma is a crucial aspect of this yet, despite their self immolation, the medical community refuses to blame both themselves and subscription kickbacks from the vaccine manufacturers. The fact that they have not taken any responsibility for their lies further degrades what shred of credibility they have left. Quacks like Hotez only confirm our suspicions,

It's really simple; in the first place, people have an inborn right to self determination; but, if you choose to get any vaccination, you have no right to tell anyone else what to do and no 'public health' justification because vaccination confers immunity. Doctors aspiring to political authority are nothing new, and the medical community had their path to power all mapped out, or so they thought, and then came heresy in the ranks, and dissent in Europe and the US only grew, and fraud became apparent, along with incompetence and bare nekkid profiteering. Moderna stock ticker, Oct. 2019, 14 bucks a share. August 2021, 463 bucks a share. COVID was very good to the stock market. Doctors make 6 figures and up, and people kiss their ashes because they are supposedly Great Healers and wisemen etc, but, turns out, some of em are just profiteers wiseguys and serial bull\*\*\*\*ers who have played the healthcare system and the insurance business masterfully, for

uncountable fortunes. Money is power, and after so much money and so much influence and so much supposed authority, they start gettin' bossy, as their support bureaucracy grows and grows. Mexico has crawled deep up the backside of US' HHS/Medicare and profited handsomely thereby. So, beware of men in white lab coats wearing stethoscopes calling themselves 'doctor', and given to lofty political and social pronouncements, including our dearly beloved surgeon general. Always get a second opinion, and study the issue of medical/healthcare fraud as though your life depended on it. It just might.

If you're in a position of influence - a respected (published) physician, financial specialist, renowned scientist (published), legal scholar, - whatever - then you have a moral obligation to speak the truth because that's what your credentials both provide, and ask for.

If you violate this aim, then you lose the trust of the people who conferred this honor on to you. The state, after all, the people - paid for it.

So when you \*\*\*\* up like Hotez, you should be stripped in Public of all these rights and privileges. Because you violated the trust of the people.

As the old system collapses western elites thru their minions are moving us to a totalitarian society of haves and have nots as in "You will own nothing and be happy". They want to remove 3 billion initially then their ultimate goal is down to 100 million. There are videos of those from the UN and the WEF actually talking about the coming reduction in the planet's population. These are truly psychopaths that actually believe they should tell us how we should live as they are all the so called experts like Gates ranting about vaccines, fake meat, depopulation and climate change but has no real experience or degrees in either. Wars, viruses and their so called cure and protection that is either, lowering living standards, collapsing the economies.

***The Two Paths to Build Back Better***

***“If there was ever a time when the West is crumbling from within, and the end goal is to Build Back Better creating a new world order from the ashes, there have been two schools of thought. First, there have been those who believed that creating another Great Depression would achieve that objective just***

*as Roosevelt ended free-market capitalism. The second is that to also reduce the population, we need a war to achieve all the goals and Build Back Better as they did following World War II"*

*Anything less than those two types of events will not achieve their goal.*

**"The future of life" – Jacques Attali**

*"In the future it will be about finding a way to reduce the population. We will start with the old, because as soon as he is over 60-65 years of age, man lives longer than he produces and costs society dearly. Then the weak and then the useless who do nothing for society because there will be more and more of them, and especially finally the stupid ones."*

*"Euthanasia targeting these groups; euthanasia will have to be an essential instrument of our future societies, in all cases. Of course, we cannot execute people or set up camps. We will get rid of it by making them believe it is for their own good. Too large a population, and for the most part unnecessary, is something economically too expensive."*

*"Socially, it is also much better for the human machine to come to a screeching halt rather than gradually deteriorating. We won't be able to give intelligence tests to millions and millions of people, you can imagine!"*

*"We will find something or cause it, a pandemic that targets certain people, a real economic crisis or not, a virus that will affect the old or the big, it doesn't matter, the weak will succumb to it, the fearful and the stupid will believe it and ask to be treated."*

*"We will have taken care to have planned the treatment, a treatment that will be the solution. The selection of idiots will thus be done by themselves: they will go to the slaughterhouse on their own."*

*"The real enemy is humanity itself – whose behaviour was to be changed."*

Now is the time to draw up a master plan [for] a new global economic system.

*It was Maurice Strong, Rockefeller's protégé, as Chair of the 1972 Earth Day UN Stockholm Conference, [who] promoted an economic strategy*

*of population reduction and lowering of living standards around the world to*

*'save the environment'. As Secretary General of the UN Rio Conference, Strong commissioned the report from the Club of Rome which admitted that the CO2 global warming claim was merely an invented ruse to force change: The real enemy is humanity itself – whose behaviour was to be changed.*

*Tim Wirth, admitted the same, "We have got to ride the global warming issue. Even if the theory of global warming is wrong,...". Alastair Crooke 'At War with Russia', Europe Peers*

*Down the Abyss*

**Field Marshall Hermann Wilhelm Göring trial at Nuremberg:**

*“Why, of course, the people don’t want war. Why would some poor slob on a farm want to risk his life in a war when the best that he can get out of it is to come back to his farm in one piece. Naturally, the common people don’t want war; neither in Russia nor in England nor in America, nor for that matter in Germany. That is understood.*

***But, after all, it is the leaders of the country who determine the policy and it is always a simple matter to drag the people along, whether it is a democracy or a fascist dictatorship or a Parliament or a Communist dictatorship.***

With respect to a **Democracy they argued, the people have some say** in the matter through their elected representatives, and in the United States, only Congress can declare wars.

**Göring replied: “Oh, that is all well and good, but, voice or no voice, the people can always be brought to the bidding of the leaders. That is easy. All you have to do is tell them they are being attacked and denounce the pacifists for lack of patriotism and exposing the country to danger. It works the same way in any country.”**

**The computer models also show a sharp drop.**

Then a quick TRIAL & ESSER QUE TION. 🗑️ 🗑️ 🗑️ 🗑️ 🗑️ 🗑️ 🗑️ 🗑️ 🗑️ 🗑️ 🗑️

#### The Nuremberg Code 1947 Permissible Medical Experiments

The great weight of the evidence before us to effect that certain types of medical **experiments** on human beings, when kept within reasonably well-defined bounds, conform to the ethics of the medical profession generally. The protagonists of the practice of human **experimentation** justify their views on the basis that such **experiments** yield results for the good of society that are unprocurable by other methods or means of study. All agree, however, that certain basic principles must be observed in order to satisfy moral, ethical and legal concepts:

1. **The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision.** This latter element requires that before the acceptance of an affirmative decision by the **experimental** subject there should be made known to him the nature, duration, and purpose of the **experiment**; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the **experiment**.
2. The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the **experiment**. It is a personal duty and responsibility which may not be delegated to another with impunity.
3. The **experiment** should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature.
4. The **experiment** should be so designed and based on the results of animal **experimentation** and a knowledge of the natural history of the disease or other problem under study that the anticipated results justify the performance of the **experiment**.
5. The **experiment** should be so conducted as to avoid all unnecessary physical and mental suffering and injury.
6. No **experiment** should be conducted where there is an a priori reason to believe that death or disabling injury will occur; except, perhaps, in those **experiments** where the **experimental** physicians also serve as subjects.
7. The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the **experiment**.
8. Proper preparations should be made and adequate facilities provided to protect the **experimental** subject against even remote possibilities of injury, disability or death.

- 9. The **experiment** should be conducted only by scientifically qualified persons. The highest degree of skill and care should be required through all stages of the **experiment** of those who conduct or engage in the **experiment**.
- 10. During the course of the **experiment** the human subject should be at liberty to bring the **experiment** to an end if he has reached the physical or mental state where continuation of the **experiment** seems to him to be impossible.
- 11. During the course of the **experiment** the scientist in charge must be prepared to terminate the **experiment** at any stage, if he has probable cause to believe, in the exercise of the good faith, superior skill and careful judgment required of him, that a continuation of the **experiment** is likely result in injury, disability, or death to the **experimental** subject. **\_JOHNLGALT.**

This one might be difficult if you haven't heard it before.

Virology is completely fraudulent. A 'virus' is really what is also called an 'exosome' and not contagious. The original idea is not real but what they've done is create artificial 'viruses' that are extremely toxic and dangerous. These artificial lipid nano particles do work like the false original idea and are contagious.

This is the world we live in today. One where a group of diabolic crazies have deceived the entire world making new diseases so they can profit from their own marketed remedies. They have worked very hard for a long period of time to reach this goal and are not going to admit anything, they know they'll hang for it.

**AllRefreshed** hours ago

Cool? Now let's discuss seasonal measles or perhaps chickenpox and smallpox outbreaks. What do you think caused those. Im sure those suffering with herpes simplex outbreaks throughout their lifetime or those suffering from shingles outbreaks ( from that non existing chickenpox previous infection) would love to learn what actually is afflicting them . So if the viruses do not exist I'm sure you have at least a solid theory on what would cause widespread transmissible diseases with repeatable and identifiable symptoms and outcomes. Heck I would like to know as well.

Now if there is a crack in the concrete and the seed can find fertile soil- a seed can take root ...

A virus may be the seed- but your immune system has to be compromised for anything to happen ...

This is why viruses (exception Anthrax) never have a 100% kill rate and the Covid death patients had multiple co-morbidities .....

Peter Hotez is the poster boy for what happened to the scientists and doctors who toiled away in obscurity, until suddenly one day they were thrust into the spotlight, with TV appearances, interviews, and people hanging off their every word. In short, it went to their heads like celebrity status often does. Now that people have moved on they're desperate for attention and it shows. Pathetic little narcissists.

Ironically, the same thing happened to the vaccine skeptic professionals, especially those clustered around Malone and Sen. Johnson. A while back I went on some of their substacks and posted a few of Johnson's pro-Ukraine and pro-Israel position papers. I also asked them at what point (after some 4 or 5 senate hearings and "round tables") was Johnson going to approach the Justice Dept. to recommend indictments based on all the evidence they'd gathered. Fucking crickets.

Those people are so star-struck by all the attention they got (hello Jessica) that they've lost all perspective. This was before the murderous rampage in Gaza BTW, but I can't even be bothered to go back and rub their noses in it. Those people are the Only Fans of the vaccine skeptic world. All research, no action.

Seriously, whoever is still stuck-on-stupid at this juncture, is not likely to politically evolve past it, until they have that overdue epiphany, which sometimes never arrives.

Evolution or devolution of humans at all scales of organization, pivots on moral character, trust, and power of discernment, meaning a real education to tell who is full of it, and who to trust.

More specifically, which methods of reasoning to trust, and why...and which reasoning methods not to trust, and why.

At least it makes clear the links between the state apparatus and the academics. For him simply to feel able to articulate these views requires him to feel instituted, that is, authorised, to intone the use of the state of apparatus to protect is honour and right to speak. If course, when you have the institutional apparatus to objectify your views as truthful, you can manipulate the state apparatus via the truths you produce. Of course, anyone who contests this is just a mine of "disinformation" which means, "not-one-of-us", "not-a-scientist possessing of an institutional apparatus to objectify their view as truthful" and so deserving of policing in order to ensure the sanctity of a public sphere produced via institutional processes born of closures. Psychopathic projection is characteristic of the products of segregated education, they feel instituted to represent in the name of truth, justice and all things holy.

RESURGENCE OF NAZISM

Nazism world takeover, instead of heil-hitler it's jab or no privilege, jab or no job, jab or no school, jab or no pension , jab or no government basic services. Ungodly dictatorial dystopian political mandates.

Governments, all corporations, all organizations, and so called Christian religions are placing themselves above God by promoting ill advised unscriptural health mandates and personal electronic ID's as an obligation to remain part of society.

Even the almighty Jehovah God gives every living human being the free will to choose whether to serve him or not as independent free agents. God allows each individual to make their personal health decision, the almighty only gives general health recommendations and then says " good health to you" Acts 15:29 says " to keep abstaining from things sacrificed to idols, from blood, from what is strangled, and from sexual immorality. If you carefully keep yourselves from these things, you will prosper. Good health to you!". Jehovah provides the rain and sunshine to those that disobey him as Jesus said- " so that you may prove yourselves sons of your Father who is in the heavens, since he makes his sun rise on both the wicked and the good and makes it rain on both the righteous and the unrighteous makes the sun shine and provides rain to the good and to the wicked" Matthew 5:45.

Nazi governments, corporation, all sort of religious organizations are placing themselves above God and want to decide who deserves to live and who doesn't deserve basic human services. They claim to know better than God and want absolute control over people lives, Nazis of today would stop the sun from shining if they could on people they term as undesirables or non conforming. Basically they want God's worship or the adoration of all their subjects and are willing to enforce it with severe penalties by depriving them of their God given right to live. Judgement of the sheep and goats belongs to God's appointed world ruler Jesus Christ.

These jabs are leading to the complete control of this world by the political system run by Satan."We know that we originate with God, but the whole world is lying in the power of the wicked one", 1 John 5:19.

Ok the beast 666 as a symbol of its defining attributes. The political beast wants the adoration or worship of all mankind- Revelation 13.

The number six implies imperfection. Often, numbers are used as symbols in the Bible. Seven typically represents completeness or perfection. Six, being one short of seven, can denote something incomplete or flawed in God's eyes, and it can be associated with God's enemies.—1 Chronicles 20:6; Daniel 3:1.

Three times for emphasis. The Bible sometimes stresses a matter by stating it three times. (Revelation 4:8; 8:13) So the name 666 powerfully emphasizes that God views human political systems as gross failures. They have been unable to bring lasting peace and security—things that only God's Kingdom will achieve.

Exactly. It's a tell. And it lets you know the underlying intentions about that side, i.e. it's all about power and control. The fact that he is incapable of what would be considered a natural and/or logical response (quietly letting the people vocally against you die off from their own, ostensibly misguided, actions) tells you everything you need to know.

Imagine an alternate scenario where some mysterious illness arose, and it was determined, perhaps in "conservative circles," that the most successful preventative measure was to take potassium supplements. So conservatives start taking supplements and are spared, but leftists, unable to bring themselves to heed the advice of anyone right-leaning, refuse the supplements under the guise that it's some conspiracy and start dropping like flies. It would be incumbent on that side, after seeing the devastating consequences of their actions, to pivot toward taking the supplements. It would not make sense for anyone right-leaning to call on that side to be "criminalized" for refusing to take the supplements or making public statements of defiance. Trying to control them that way, though, would strongly imply that either, a) the supplements are actually harmful and you want that side to take them and suffer the negative effects, or b) you want to have the power of weaponizing messaging by punishing political opponents voicing a different opinion publicly than your own.

We are no closer to avoiding the fervant wishes apparently, of persons such as hotez than prior to covid capers. Imo..

Therefore, if again something hits, and likely much worse, we will do what?

Plenty o' time spent pondering in relative safety in the aftermath of covid to get where?

Voting harder for either of the two figureheads of government most associated with covid and clot shots?

Suggests very little time or success in the middle of another event.

New tactics are recommended.

But so many choose to believe differently.

If Hotez is making you mads, how is he worse than any of the rest of them still recommending? Still making excuses.

Faulty logic. And very disturbing.

Because, let's face it. He's easy. Ish.

Not everyone is suggesting concentration camps for vaxx skeptics. To be sure. Forced vaccinations presumably?

Nonetheless. Demonstrate who in congress or any government leader anywhere is doing what exactly to avoid your scrutiny here.

No mandates cutting the mustard for you huh?

This means so much in light of 80% self vaccinating under assurances the substance was necessary and safe. If not coercion and or intimidation by the very ample girth of "government".

### **Disinformation.**

Its global policymakers that are really suffering.

### **Our knowledge of banking has been going backwards since 1856.**

Credit creation theory -> fractional reserve theory -> financial intermediation theory

“A lost century in economics: Three theories of banking and the conclusive evidence” Richard A. Werner

<http://www.sciencedirect.com/science/article/pii/S1057521915001477>

They won't be able to see the problem with free market theory.

### **Free market theory always was fundamentally flawed.**

The bank's ability to create money has always been the problem.

This is where it all goes wrong.

### **“We believe in free markets” global policymakers.**

Why are global policymakers making the same mistakes as the US in the 1920s?

They didn't know about the fundamental flaw in free market theory.

### **The free market thinkers of the 1930s realised it was the bank's ability to create money that had upset their free market theories.**

Henry Simons and Irving Fisher supported the Chicago Plan to take away the bank's ability to create money.

*“Simons envisioned banks that would have a choice of two types of holdings: long-term bonds and cash. Simultaneously, they would hold increased reserves, up to 100%. Simons saw this as beneficial in that its ultimate consequences would be the prevention of "bank-financed inflation of securities and real estate" through the leveraged creation of secondary forms of money.”*

[https://www.newworldencyclopedia.org/entry/Henry\\_Calvert\\_Simons](https://www.newworldencyclopedia.org/entry/Henry_Calvert_Simons)

That was the problem with free market theory then, and it's the same now.

**Global policymakers believed in free markets, but they weren't aware free markets need to be kept free of the money creation of bank credit.**

They kept pumping up real estate ponzi schemes with the money creation of bank credit, only to stare in disbelief as they then collapsed again.

Things then went from bad to worse as the collapse in asset prices fed back into the banking system.

**Real estate - the wealth is there and then it's gone.**

1990s – UK, US (S&L), Canada (Toronto), Scandinavia, Japan, Philippines, Thailand

2000s – Iceland, Dubai, US (2008), Vietnam

2010s – Ireland, Spain, Greece, India

Get ready to put China, Australia, Canada, Norway, Sweden, China and Hong Kong on the list.

It wasn't real wealth, just a ponzi scheme of inflated asset prices.

**Rolling neoclassical economics out globally has allowed it to reveal all its flaws and I could now see what it always was.**

Neoclassical economics is a pseudo economics; it's more about hiding the discoveries of the classical economists than telling you how an economy actually works.

At the lowest level it confuses money and wealth.

No wonder global policymakers are struggling.

**Where did the corruptions in the economics manifest themselves in the global economy?**

We saw problems develop in two main areas.

**Rentiers make money, they don't create wealth.**

Rentier activity in the economy has been hidden by confusing making money with creating wealth.

**Everyone had expected economic liberalism to unleash capitalist dynamism.**

Instead there was a stampede towards the easy money of "unearned" income.

In 1984, for the first time in American history, "unearned" income exceeded "earned" income.

The rentiers have never had it so good.

Instead of capitalist dynamism, the opposite emerged, a parasitic, rentier capitalism.

**Everyone loves the easy money of unearned income, e.g. capital gains, rent, dividends and interest**

Real wealth creation involves real work producing new goods and services in the economy.

**Banks create money, not wealth.**

<https://www.bankofengland.co.uk/-/media/boe/files/quarterly-bulletin/2014/money-creation-in-the-modern-economy.pdf>

The confusion over wealth and money puts banking and finance first, and the real economy second.

Real wealth creation takes place in the real economy.

**You always get into trouble with banking when using neoclassical economics.**

Global policymakers are making the same mistakes as the US in the 1920s.

We now know what went wrong first time around as global policymakers keep making the same mistakes over and over again.

**The economic illusion of neoclassical economics.**

Money is borrowed from banks to fund the purchase of assets and push up asset prices.

The new money created by borrowing from banks drives the economy.

Banks create money and debt at the same time, but policymakers are oblivious to the debt piling up in the banking system

The mechanics of the banking system are a mystery, and as far as policymakers are concerned it must be rising asset prices that are so good for the economy.

**Everything balances on the way up; you've got the assets on one side of bank balance sheets and the loans on the other.**

Asset prices fall, and holes start to open up in the banking system.

A big fall in asset prices will leave a lot of insolvent banks.

The asset price "wealth" has gone and all that is left is the debt and insolvent banks.

**Global policymakers never stood a chance.**

Here's an eminently practical and prudent solution. Since no one will ever be satisfied as to whom is specifically involved with covid and clot shots. And the not so hidden nor slow march to world government evidenced in the responses meted out during these mega events.

Arrest all of congress, management of federal law enforcement and military and intelligence. For starters.

This becomes a lot less complex if clot shots are in fact dangerous and intentionally so.

**From British Journal of Pharmacology:**

October 2023

**Cardiac side effects of RNA-based SARS-CoV-2 vaccines:** Hidden *cardiotoxic effects of mRNA-1273* and BNT162b2 on ventricular myocyte function and structure

After 48 h, expression of the encoded spike protein was detected in ventricular cardiomyocytes for both mRNAs. At this point in time, mRNA-1273 induced arrhythmic as well as completely irregular contractions associated with irregular as well as localized calcium transients, which provide indications of significant dysfunction of the cardiac ryanodine receptor (RyR2). In contrast, BNT162b2 increased cardiomyocyte contraction via significantly increased protein kinase A (PKA) activity at the cellular level.
