GPS—Robert "Robin" Westman devices were present during at least 5 antifa protests. Upon cross pollinating devices at his residence, there were numerous 'burner' phones. His devices have also appeared to have been present with a number of Zizians, including their founder Jack LaSota, on two occasions two months apart.

It adds up, because he claims to "hate fascism & inequality", he had "1312" in his username. He was 100% trantifa, not a "right winger" like many lying Antifa are trying to claim to distance themselves from the sh*t storm surrounding the church shooting of children.

It's also important to point out that the Far Left/Antifa to Trans pipeline many times, terminates with incorporating Nazi ideology through the Pro Palestine intersection involved.

The Zizians, are a cult-like group that has been widely described in media reports as a radical collective primarily consisting of transgender vegans with ties to rationalist communities, anti-AI ideologies, and extreme activism.

This group has been linked to a series of murders and suspicious deaths across multiple U.S. states in 2025, earning it labels like "trans murder cult" or "vegan death cult" in various news outlets and online discussions.

The Zizians originated from online rationalist and effective altruism circles in the Bay Area, drawing in highly intelligent individuals, including math geniuses and programmers.

The group's leader, Jack LaSota (also known as "Ziz" or "Jack Ziz"), is a transgender person who reportedly promoted extreme veganism, anti-artificial intelligence views, and authoritarian control over members.

Experts have compared it to cults using models like Steven Hassan's BITE (Behavior, Information, Thought, and Emotional control) framework, noting how it allegedly manipulated followers through emotional and ideological means.
